OBJECTIVE

Full-stack developer with 5+ years of experience working on ERP, government systems, SaaS, and marketplace projects. My work focuses on building and improving digital systems, automating business processes, and integrating different services to solve real business needs.

EDUCATION

Bachelor of Science (BSc), Westminster International University in Tashkent 2020 - 2024
Relevant Courses: Computer Science Fundamentals, Distributed Systems and Cloud Computing, Software Quality, Performance and Testing, Database Systems Development.

SKILLS

Languages	TypeScript, JavaScript, Python
Frontend	Next.js, React, Vue 3, Remix, Tailwind CSS, Zod, Pinia
Backend	NestJS, FastAPI, Django, REST APIs, WebSocket, Prisma
Data	PostgreSQL, MongoDB, Redis, Baserow
Integrations	Click, Payme, Telegram Bot & Mini Apps, Meta Graph API, SMS/OTP, Webhooks
DevOps	Docker, Nginx, Linux, CI/CD, GitHub Actions, RabbitMQ, Headwind MDM
AI	Claude Code, AI-assisted development, LLM integration

EXPERIENCE

Chief Specialist for Digitalization Aug 2026 - Present
Social Inspection under the National Agency for Social Protection under the President of the Republic of Uzbekistan
Tashkent, Uzbekistan

- Develop the integrations with 40+ government digital platforms and services, including MyGov, DMED, IHMA, and other national information systems, enabling automated data exchange and streamlined organizational workflows.
- Manage the organization's Android tablets through Headwind MDM, including application deployment, device configuration, security policies, monitoring, and usage analysis.
- Develop software solutions and system integrations using Python, JavaScript, APIs, and webhooks, while maintaining and improving automations built with Node-RED and Baserow.
- Work with Linux servers, databases, Docker, and data analytics to develop, deploy, and maintain reliable digital solutions.

Founder & Full-Stack Developer Jun 2025 - Present
BookUp (bookup.uz) *Tashkent, Uzbekistan*

- Built a multi-tenant booking & business-management SaaS serving 20+ service businesses (barbershops, salons, billiards clubs), spanning a Telegram mini-app for owners, a customer-facing Next.js booking site, and a NestJS/PostgreSQL backend.
- Built an Instagram automation suite (comment/DM auto-replies, ice breakers, and AI-powered replies) on the Meta Graph API, turning social engagement into bookings.
- Designed and shipped end-to-end payments with Payme: a per-user prepaid wallet that auto-deducts SaaS subscription fees from top-ups.

Full-Stack Developer Jan 2022 - Avg 2026
InterRail Central Asia *Tashkent, Uzbekistan*

- Developed and maintained multiple custom ERP systems to automate core business processes, including accounting (acts, contract management), KPI tracking, and inquiry handling.
- Led development of an AI-powered document processing tool that reads scanned documents, extracts relevant data, and stores it in a structured database — eliminating manual Excel entry.
- Built a KPI monitoring system for the sales department to evaluate team and individual performance metrics.

Backend Developer Intern

InterRail Central Asia

Feb 2022 - Aug 2022

Tashkent, Uzbekistan

- Developed unit tests using pytest for a Django project, improving code reliability and quality.
- Optimized the process for handling orders, significantly reducing processing time.

PROJECTS

Smart Monitoring — Organizational Digitalization System. Full-stack developer of an internal information system that fully digitizes organizational workflows, replacing paper-based processes with centralized digital management. Covers document workflows, HR management, employee access control, and real-time integration with fingerprint turnstiles for attendance tracking. Integrated with 40+ government online platforms, including MyGov, DMED, IHMA, and other government services.

InterRail — ERP for International Logistics. Full-stack developer of ERP and CRM platforms built from zero to fully automate core business processes for an international rail-freight logistics company. Built with Vue.js, Next.js, Django, and Docker Compose. (system.interrail.uz)

BOOKUP — Online Booking Platform (SaaS). Founder & full-stack developer of a multi-tenant booking and client-management SaaS for service businesses. Integrated Payme payments and Instagram auto-reply automation. Built with Next.js, NestJS, and PostgreSQL. (bookup.uz)

MyPolis — Insurance Marketplace. Full-stack developer of a marketplace where customers buy insurance policies in one place and insurance companies join as listed partners. Delivered payment processing, point-of-sale systems, contract management, an admin panel, and business reporting. (my-polis.uz)

Do'mbirobod City — Enterprise Landing Page. Front-end developer of a professional landing page for a local real estate company, featuring apartment floor plans, virtual tours, and a price calculator. Built with Next.js and Figma-based UI/UX prototyping. (dombirobod-city.uz)
